REQUEST TO OFFER A
BACCALAUREATE DEGREE
IN
MATHEMATICS
Program Description

Given the pervasive use of mathematics in all sectors of the economy, a degree in Mathematics provides the student with the capability required to pursue a wide variety of interesting, challenging, and rewarding careers. The program is designed to meet the needs of those students who wish to acquire certain mathematical techniques for use in life situations as well as those whose interests lie in mathematics itself.

The Mathematics degree will require students to complete a set of rigorous core courses which will provide graduates with a foundation of the fundamental areas of calculus, linear algebra, Euclidean/Non-Euclidean geometry, analysis, number theory, probability, and statistics. The Math degree requires the completion of at least 120 semester credits, including at least 25 credits of general education.

All content courses in the program will be taught by faculty members of the Department of Mathematics, several of whom have terminal degrees and many of whom have experience teaching math at the secondary level.

Purpose of Degree

Mathematics is an appropriate degree for students preparing for careers in actuarial science, statistical analysis, operations research, engineering, secondary education, and for those who wish to pursue graduate study in mathematics.

Institutional Readiness

With steady and sustained development as a baccalaureate institution, DSC’s infrastructure and institutional environment are now fully ready to respond to Southern Utah’s demand for more varied degrees. The institution has devoted resources and attention to developing student services and library services. Dixie State College now has a decade of experience as a baccalaureate institution, and it boasts an infrastructure and institutional environment appropriate for its role. Thoughtful and sustained attention to seeking and retaining credentialed teaching faculty, developing student services and library and technological resources, and funding facilities expansion have poised the institution to successfully add the proposed degree.

Within the Department of Mathematics, upper-division courses have been offered each semester for the past several years. Enrollment has increased dramatically since the first offerings. For example, Linear Algebra increased from 10 in Fall 2006 to 22 in Fall 2009; Euclidean/Non-Euclidian Geometry increased from 3 in Fall 2006 to 14 in Spring 2010. The total number of upper-division students increased from 9 (Spring 2007) to 43 (Spring 2010).

While some of the department faculty have terminal degrees and are qualified to teach upper-division courses, other members of the department are experienced in teaching the lower-division mathematics courses which are required for general education.
Faculty

The mathematics faculty at DSC is composed of qualified, experienced and diverse professors. At this time, no new faculty members will need to be added. The current physical sciences faculty at Dixie State College is also sufficient to offer the additional courses for the science component of the Math degree. There are individuals holding doctoral degrees in each sub-discipline. As the program grows, additional faculty may be needed to accommodate growth. See Appendix A for the list of current faculty (full-time and adjunct) and the background and qualifications of each.

Staff

The Mathematics Department at Dixie State College currently functions with one .74-time secretary and one work-study student, which is sufficient at this time. Currently, the department has a lecturer (60%)/advisor (40%). As the program grows, additional advising personnel will be added.

Library and Information Resources

Dixie State College is well aware that building library sources is an integral part of program development, and the Browning Library continues to expand appropriate collections for current baccalaureate offerings. The library currently has sufficient titles in mathematics itself, with additional titles in secondary mathematics and an abundance of titles in secondary education. Many of the resources in the library are electronic offerings. Journals in mathematics and math education are on the library shelves, and videos and CDs are also available. See Appendix D for a list of the current resources in the Browning Library.

Program Need

A B.A. or B.S. degree in Mathematics is almost universally offered at baccalaureate institutions. Although a Mathematics Education degree will appeal to more students, the offering of a Mathematics degree will encourage some students to continue their education at Dixie instead of transferring to another college or university. Most of the classes that are offered for the Math Education degree are also required for the Math degree.

Benefits

Baccalaureate completion rates in Utah are declining, and one probable contributor is access. While associate degree attainment in Washington County is strong (38% compared to 17.7% for the state), baccalaureate attainment for the 25- to 34-year-olds is almost reversed (17.4% in Washington County compared to 25.4% for the state). (DSC Environmental Background) Complex issues have complex answers but at least one contributing factor is that DSC has
provided only associate degrees for most of its history and still offers only a few baccalaureate
degrees. The proposed degree in Mathematics should contribute to reversing this trend.

Consistency with Institutional Mission

The proposed degree in Mathematics is in keeping with DSC’s mission to offer baccalaureate
programs in “core or foundational areas.

Program Assessment

Each department at DSC goes through a program review prescribed in policy. This review
includes assessment of facilities, teaching resources, curricular design, and academic
achievement of learning objectives. Each department is reviewed on a five-year rotation, and the
Mathematics Department is due for review in 2014. At that time, the baccalaureate program will
be examined as per the program review policy.

Expected Standards of Performance

Central to this degree proposal is a commitment to student assessment and, ultimately, to the
production of quality graduates. Graduates of the Mathematics program will receive the
necessary tools to successfully move on to careers and/or to graduate work.

Mathematics graduates must complete 45 credits of coursework directly related to mathematics
knowledge and a 10-credit calculus-based physics sequence.

Each course in the curriculum will have identified learning outcomes that must be achieved upon
completion of the course. The ability to formulate mathematical proofs is one learning outcome
in all courses numbered above 3000, as this is a necessary skill for graduate work in
mathematics.
APPENDICES

A: Mathematics Faculty (full-time and adjunct)
B: Required Courses for the Mathematics Degree

AWARDS

Received special recognition from Dixie State College’s Disability Resource Center for "extra effort in helping us level the academic playing field for our students with learning differences and other disabilities."  Feb. 2009

Graduated Summa Cum Laude from Utah State University (twice) 2001 and 2003

Graduated as Co-Valedictorian from Great Falls High School, Great Falls, MT May 1995

Earned music awards while at Great Falls High School, including: 1994 - 1995  
• Principal chair bassoonist, All-State Orchestra (1995)  
• All-State Band (1994)  
• All-Northwest Choir (1994 and 1995)

Became an Eagle Scout Jan. 1993

TEACHING EXPERIENCE

Dixie State College of Utah, St. George, UT  
Tenure-Track Instructor 2008 - present  
Taught four mathematics courses per semester (two in the summer) at DSC, including Intermediate Algebra, College Algebra, Mathematics for Elementary Teachers I and II, Calculus I, and Statistics (introductory course)

Montana State University, Bozeman, MT  
Graduate Teaching Assistant 2004 - 2008  
Taught one mathematics course per semester (including summers) at MSU, including Mathematics for Elementary Teachers I and II, Precalculus, Survey of Calculus (for business majors), and Calculus I and II (for science/engineering majors); responsible for preparing and teaching lessons, holding office hours for one-on-one tutoring, creating exams, grading exams, and assigning final grades

Brigham Young University–Idaho, Rexburg, ID  
Lecturer 2003 - 2004
Taught five sections of mathematics in the fall and spring in the following courses: Quantitative Reasoning, College Algebra, and Statistics (introductory course); taught two more sections of College Algebra in the summer

_Utah State University, Logan, UT_

**Graduate Teaching Assistant**  
2001 - 2003

Taught one mathematics course per semester at USU (including summers), including Intermediate Algebra, College Algebra, and Calculus Techniques (for business majors); similar responsibilities to teaching position at Montana State University

Dixie State College of Utah
Lecturer/Advisor  2009-Present
Academic advisor for students majoring in Mathematics and Math Education, and
Also teaching nine credit hours per academic year.

Dixie State College of Utah
Adjunct Instructor – Mathematics Department  1993-2009
Taught Intermediate Algebra (Math 1010) and Quantitative Reasoning (Math 1030)

Mission College (Santa Clara, CA) and West Valley College (Saratoga, CA)
Adjunct Instructor – Psychology Department  1990-1993
Taught General Psychology and Developmental Psychology courses

City College of San Francisco
Adjunct Instructor – Psychology Department  1988-1990
Taught General Psychology, Personal and Social Adjustment, Developmental Psychology

Broome Community College, Binghamton, New York
Adjunct Instructor–Mathematics Department  1982-1985
Taught College Algebra and Trigonometry, Finite Math, Statistics

Brigham Young University
Instructor–Mathematics Department  1981-1982
Worked as a temporary faculty member at BYU. Taught College Algebra and Trigonometry

RELATED EXPERIENCE

San Francisco Unified School District
School Psychologist  1985-1989
Did intellectual assessments and developed programs for disadvantaged
children attending non-public schools. First two years were full-time, Second
two years were part-time.

Binghamton City School District, Binghamton, New York
School Psychologist  1982-1985
Did intellectual and behavior assessments for children to determine eligibility
for various special education programs. First year was full-time, other years
were part-time.

## EDUCATION

**Southern Utah University, Cedar City, Utah**  
**Master of Education**  
Thesis: “Helping Middle School Students Achieve Academic Success through a Character Education Program.”  
2005

**Brigham Young University, Provo, Utah**  
**B.S. Elementary Education**  
1973

## AWARDS

~ Finalist Washington County School District Teacher of the Year,  
   2002 and 2004
~ Verizon GIFT Grant Recipient for Math/Science Collaboration  
   2001
~ Wal-Mart Teacher of the Year  
   2000
~ George Shell Secondary Math Educator of the Year  
   1996
~ Huntsman Excellence in Education Recipient  
   1995
~ Superintendent’s Award for Excellence  
   1993

## TEACHING EXPERIENCE

**Dixie Middle School, Washington County School District, St. George, Utah**  
**Algebra Teacher**  
Teach 8th and 9th graders Algebra concepts as a pre-requisite for Geometry  
1990 - Present

**Dixie State College, St. George, Utah**  
**Adjunct Instructor** – Math for Elementary Teachers 2010 and 2020  
Developed syllabus and overall course structure, and administered all grades.  
2003 - Present

**Washington County School District, St. George, Utah**  
**District Math Coordinator**  
Work with teachers, staff developers, and principals training on best practices in math education.  
Includes modeling math lessons at all levels, K – 12.  
2005 – Present

**Utah State Office of Education**  
**State Math Trainer for Secondary Educators**  
Worked with secondary math teachers on different strategies to use in teaching mathematics  
2002 - 2009

**Socorro Independent School District, El Paso, Texas**  
**Fifth Grade Teacher**  
1988 – 1990

**Department of Defense Schools, Germany**  
**Fifth/Sixth Grade Teacher**  

**Spectrum Academy for Gifted and Talented, El Paso, Texas**  
**Upper Grade Teacher**  
1981 – 1983

**Provo School District, Provo, Utah**  
**Sixth Grade Teacher**  
1973 – 1978
RELATED EXPERIENCE

Salt Lake City, Utah

**Utah Mentor Academy Graduate** 2006
Trained on how to mentor teachers, how to coach peers, and how to provide leadership in education

Las Vegas, Nevada

**Professional Learning Community** 2004 and 2005
Attended workshop to assist implementation in Washington County School District schools.

*Washington County School District, St. George, Utah*

**Seven Habits for Highly Effective People** 1996
Trained facilitator for ‘Seven Habits’. Provided several trainings in Washington County School District for district personnel

PUBLICATIONS/PAPERS/PRESENTATIONS

~ ASPIRE (A Success Program In Reaching Excellence) Curriculum. Chairperson for writing 3 years of Character Education curriculum for Middle School students 2000

~ National Council of Teachers of Mathematics Presenter at 4 National Conferences and 2 Regional Conferences

EDUCATION

Texas A&M University, College Station, TX
M.S. in Computer Science 1998
Honors: Board of Regents Graduate Fellowship, 1990-1991

The University of Tennessee at Martin, Martin, TN
B.S. in Secondary Education 1972
Areas of Concentration: Health, Physical Education, and Mathematics

TEACHING EXPERIENCE

Dixie State College, St. George, UT
Adjunct Instructor – Department of Mathematics 2009 – 2010
Develop syllabi and overall course structure, and administer all grades for assigned College Algebra/Pre-Calculus courses.

Texas A&M University, College Station, TX
Teaching Assistant – to Dr. Petersen in Computer Science 1991 – 1992
Supervised lab programming exercises, administered lab grades, and assisted in grading lecture tests for programming in Pascal and Fortran.

The University of Tennessee at Martin, Martin, TN
Adjunct Instructor – Department of Mathematics and Computer Science 1982 – 1989
Developed overall course structure and administered grades for developmental math courses.

Tennessee – Union City School District
Florida – Orange County and Seminole County School Districts
In addition to classroom instruction, worked on a team that developed supplemental mathematics materials for sixth graders, and volunteered as a math tutor at a facility for troubled youths.

RELATED EXPERIENCE

Learning Designs, Inc., Park City, UT
Instructional Designer/Developer 2001 – Present
Design/develop custom learning systems (both paper-based and computer-based) for internal instructional and training use by major corporations, primarily pharmaceutical. Work involves researching, writing, editing, proofing, designing/developing supporting graphics and animations, and the generation of progress checks, chapter/module reviews, and exams.

ARUP Laboratories, Salt Lake City, UT
IT Applications Development Supervisor 2001 – 2007
Supervised a software development team responsible for the development and maintenance of software to track specimens submitted for testing at ARUP. Played key role in promoting continuous education/training for software developers and establishing standards for software quality, technical documentation, and process improvement for ARUP’s IT Department.

COURSE DESCRIPTIONS
Course Descriptions

MATHEMATICS (MATH)

MATH 1001 1st Yr Exp - Intro to Math 1.00 CR

MATH 1001 is an orientation course created to help students succeed in the math major. It is also designed to help new freshman and returning students to make a successful transition to being a college student. The primary objective of this course is to provide you with the resources you will need to succeed in your college career, particularly in your math courses. 2 lecture hours per week.

MATH 1010 Intermediate Algebra 4.00 - 5.00 CR

Designed for students who need preparatory work before entering the minimum courses that fulfill the general education math requirement. Concepts emphasized in this course include the properties of the real number system, sets, functions, graphs, algebraic manipulations, linear and quadratic equations, systems of equations, and story problems. Students will be expected to reason mathematically and solve mathematical problems. This course is a lecture course and will include homework assignments, quizzes, tests, and a comprehensive final exam. Successful completion of the course gives students good preparation for college-level math courses. Satisfies prerequisites for MATH 1030, 1050, 1090, and BIOL 2400.

Prerequisite: MATH 0990 (with an earned grade of C or better) or ACT score of 18 or higher within two years of enrollment. 4 or 5 lecture hours per week.

MATH 1030 Quantitative Reasoning *MA 3.00 CR

This course is designed for general studies or liberal arts students majoring in humanities or other non-science programs seeking only an associate degree or certificate. The focus of the course is on the development of analytical problem solving skills through the application of various mathematical concepts to real-life problems. Topics of study include: modeling with algebra; geometry; logic; financial math; right triangle trigonometry (indirect measurement); probability and statistics. Successful completion of this course will satisfy the general education math requirements. Students who wish to enter four year programs are strongly encouraged to check with departments at transfer schools to determine program compatibility. Although this course transfers to all colleges and universities in Utah, it does not commonly meet specific department requirements.

Prerequisite: Math 1010 (with an earned grade of C or better) or ACT score of 23 or higher. 3 lecture hours per week.

MATH 1040 Intro to Statistics *MA 3.00 CR

Designed as an introduction to basic concepts and methods used in statistical data analysis. Course includes descriptive statistics, sampling and inferential methods. Emphasizes problem solving and critical thinking.

Prerequisite: Math 1010 (with an earned grade of C or better ) OR placement test score of 23 or higher. 3 lecture hours per week.
MATH 1050 College Algebra/Pre-Calculus *MA 4.00 - 5.00 CR

Designed for students majoring in science and engineering who need a calculus and/or physics series. Review of fundamental algebra. Polynomial and rational functions will be explored. Introduction into exponential and logarithmic functions and their applications. Trigonometric functions dealing with graphs, identities and equations including inverse functions. This course is a lecture course with homework assignments, quizzes, tests, and a comprehensive final exam. Successful completion of the course prepares students for MATH 1060. Satisfies prerequisites for MATH 1060, MATH 1100 and MATH 2010. Math 1050 is required for Utah Teacher Certification.

Prerequisite: MATH 1010 (with an earned grade of C or better) or ACT score of 23 or higher within two years of enrollment. 4 to 5 lecture hours per week.

MATH 1060 Trigonometry *MA 3.00 CR

Continuation of MATH 1050. Further discussion in trigonometry and its applications. Analytic Geometry including conic sections, systems of equations and inequalities and partial fractions. Introduction into discrete algebra including sequences and series and the binomial theorem. This course is a lecture course with homework assignments, quizzes, tests, and a comprehensive final exam. Successful completion of the course provides students with the concepts needed to continue in a Physics or Calculus series. Satisfies prerequisites for MATH 1210 and PHSX 1110.

Prerequisite: Math 1050 (with an earned grade of C or better) or equivalent. 3 lecture hours per week.

MATH 1065 Precalculus w/Trigonometry *MA 5.00 CR

Designed for students who need an in depth review of precalculus and trigonometry before entering trig-based calculus. This course reviews the mathematical concepts taught in Math 1050 and Math 1060. Students who choose to apply Math 1065 toward graduation cannot also count Math 1050 or Math 1060.

Prerequisite: Within the previous two years a placement test score equivalency of 25 or better OR within the past two years Math 1010 with an earned grade of B or better OR successful precalculus experience more than two years ago. 5 lecture hours per week.

MATH 1100 Business Calculus *MA 3.00 CR

Designed for students majoring in business, life sciences, certain computer science emphases, and certain allied health programs who are required to take a one semester calculus course. Concepts emphasized in this course include functions, modeling, differentiation, applications of differentiation, exponential and logarithmic functions, integration, applications of integration, and functions of several variables. Course includes; lectures, homework assignments, quizzes, tests, and a comprehensive final exam. Successful completion of the course provides students with the required calculus techniques that satisfy all areas requiring just one quarter of calculus.

Prerequisite: Math 1050 or Math 1090 (with an earned grade of C or better) or ACT score of 25 or higher. 3 lecture hours per week.
**MATH 1210 Calculus I *MA 5.00 CR**

Designed for students intending to earn an Associate of Science degree and then transfer to a mathematics, engineering program, or other calculus-based major at a four-year institution. Students will gain a basic understanding of calculus, the mathematics of motion and change. Topics include limits and continuity, differentiation, applications of differentiation, integration, applications of integration, derivatives of exponential functions, logarithmic functions, inverse trigonometric functions, hyperbolic functions and related integrals. Students must have a working knowledge of college algebra and trigonometry, and a graphing calculator is strongly recommended. Course includes lecture and homework assignments, quizzes, tests and a final comprehensive exam. Successful completion of the course prepares students for Calculus II. Satisfies prerequisites for MATH 1220 and PHSX 2210.

Prerequisites: MATH 1050 and MATH 1060, or MATH 1065 (with an earned grade of C or better) or ACT score of 26 or higher. (Math 1060 is strongly recommended for all students.) 5 lecture hours per week.

**MATH 1220 Calculus II *MA 4.00 CR**

This course is the continuation of MATH 1210. Topics covered includes arc length, area of a surface of revolution, moments and centers of mass, integration techniques, sequences and series, parameterization of curves and polar coordinates, vectors in 3-space, quadric surfaces, and cylindrical and spherical coordinates. Course includes lecture, homework assignments, quizzes, tests and final comprehensive exam. Successful completion of the course prepares students for MATH 2210.

Prerequisite: Math 1210 (with an earned grade of C or better) or equivalent. 4 lecture hours per week.

**MATH 1800 Mathematics Work Experience 1.00 - 3.00 CR**

Cooperative Education relates the classroom to the employment community. Those with a designated major and a vocational or career interest may be assisted in locating employment that relates to classroom studies. If a student has approved employment, they may be eligible for academic credit based upon the completion of structured learning objectives. Cooperative Education is available in all divisions. Permission must be obtained from the director of cooperative education before registration. Students are limited to four cooperative education credit courses or 12 cooperative education credits. Fall section.

**MATH 1810 Mathematics Work Experience 1.00 - 3.00 CR**

Cooperative Education relates the classroom to the employment community. Those with a designated major and a vocational or career interest may be assisted in locating employment that relates to classroom studies. If a student has approved employment, they may be eligible for academic credit based upon the completion of structured learning objectives. Cooperative Education is available in all divisions. Permission must be obtained from the director of cooperative education before registration. Students are limited to four cooperative education credit courses or 12 cooperative education credits. Spring section.

**MATH 1820 Mathematics Work Experience 1.00 - 3.00 CR**

Cooperative Education relates the classroom to the employment community. Those with a designated major and a vocational or career interest may be assisted in locating employment that relates to classroom studies. If a student has approved employment, they may be eligible for academic credit
based upon the completion of structured learning objectives. Cooperative Education is available in all divisions. Permission must be obtained from the director of cooperative education before registration. Students are limited to four cooperative education credit courses or 12 cooperative education credits. Summer section.

**MATH 2010 Math for Elem Teachers I 3.00 CR**

The first course in a two-semester sequence in mathematics appropriate to the needs of the elementary/middle school teacher. Topics include: problem solving, sets, numeration systems, whole numbers, algorithms of arithmetic, number theory, rational numbers and decimal numbers. Required for prospective elementary school teachers.

Prerequisite: Math 1050 (with an earned grade of C or better) and is required for Level 1 Math Endorsement and Elementary (K-8) Certification. 3 lecture hours per week.

**MATH 2020 Math for Elem Teachers II 3.00 CR**

A continuation of Math 2010. Topics include: real numbers, statistics, probability, geometry, measurement, and algebra. Required for prospective elementary school teachers.

Prerequisite: MATH 2010 with an earned grade of C or better. 3 lecture hours and 2 practicum hours per week.

**MATH 2200 Discrete Mathematics 3.00 CR**

Designed primarily for students majoring in computer science. Topics include logic (including Boolean), set theory, functions, prepositional calculus, graph theory, combinatorics and counting methods. Prerequisite: Math 1100 or 1210 (with an earned grade of C or better). (Offered spring semesters.) 3 lecture hours per week.

**MATH 2210 Multivariable Calculus *MA 3.00 CR**

This course is the continuation of MATH 1220. Includes partial derivatives, gradient vectors, Lagrange multipliers, multiple integrals, line integrals, Green's Theorem, surface integrals, the Divergence Theorem, and Stokes' Theorem. MathCAD - Calculus will also be introduced in computer labs. Course includes lecture and homework assignments, quizzes, tests and a comprehensive final. Successful completion of the course prepares students for all areas that require calculus as a prerequisite. Satisfies prerequisites for ENGR 2000.

Prerequisite: Math 1220 with an earned grade of C or better. 3 lecture hours per week.

**MATH 2270 Linear Algebra 3.00 CR**

Designed for mathematics and pre-engineering majors. Covers matrix and vector analysis and systems of equations with applications, linear dependence and independence, matrix algebra and invertibility, determinants and their applications, Cramer's Rule, diagonalization, eigenvalues and eigenvectors, linear transformations (kernel and range), inner product and orthogonality. Covers vector spaces and subspaces, including null and column and bases. Introduces basic proof theory. Uses lecture, text assignments, student presentations and discussions. Successful completion enhances students' post-calculus mathematical skills.
Prerequisite: Math 1210 with an earned grade of C or better. 3 lecture hours per week.

**MATH 2280 Ordinary Differential Equation 3.00 CR**

Designed for mathematics and pre-engineering majors. Covers methods of solving ordinary differential equations with applications. Separation of variable, homogeneous and non-homogeneous, exact, first and higher order, integrating factors, substitution methods, linear and non-linear, complex characteristic roots, variation of parameters, undetermined coefficients (superposition and annihilator approach) and Euler-Cauchy will be covered. Systems of equations, power series solutions, and the Laplace transform will be introduced. Uses lecture, text assignments, student presentations, and class discussion. Successful completion enhances students' post-calculus mathematical skills with applications.

Prerequisites: Math 2210 and Math 2270 with an earned grade of C or better. (Concurrent enrollment allowed.) 3 lecture hours per week.

**MATH 2989 TI-89 Calculator Skills 1.00 CR**

A course designed specifically to aid students in using the TI-89 calculator. A study guide will be provided, with demonstrations projected overhead for students to follow as they learn through hands-on experience. Covered features include basic computation, matrices, graphing, and calculus applications. The TI-92 and TI Voyage 200 calculators are similar to the TI-89 and are also acceptable tools for the course.

Prerequisite: Own or have access to TI-89, TI-92 or TI Voyage 200 calculator. One lecture hour per week.

**MATH 3000 History of Mathematics 3.00 CR**

Designed for all interested students. This course is a brief survey of the history of mathematics and its impact on world culture. Emphasis will be on the principal ideas of importance in the development of the subject, mathematical motivations and applications. This course partially fulfills requirements for Mathematics Endorsements Level 4 through the Utah State Office of Education. Offered upon sufficient demand.

Prerequisite: MATH 1220 (with an earned grade of C or better). 3 lecture hours per week.

**MATH 3100 Euclidean/Non-Euclidean Geometry 3.00 CR**

Designed primarily for education majors. This course includes axiomatic development of geometry: Euclidean and non-Euclidean. This course partially fulfills requirements for Mathematics Endorsements Level 3 and 4 through the Utah State Office of Education. Offered upon sufficient demand.

Prerequisite: MATH 1220 and MATH 2300 (with an earned grade of C or better). 3 lecture hours per week.

**MATH 3200 Intro to Analysis 3.00 CR**

Designed for those interested in advanced mathematics. This course introduces the construction of rigorous proofs of mathematical claims in beginning analysis. This course partially fulfills requirements for Mathematics Endorsements Level 3 and 4 through the Utah State Office of Education. Offered upon sufficient demand.
Prerequisite: MATH 2210, MATH 2280 and MATH 2300 (with an earned grade of C or better). 3 lecture hours per week.

**MATH 3210 Intro to Analysis II 3.00 CR**
Continuation of MATH 3200. Advanced Multivariable Calculus. Topics include continuity, differentiation, chain rule, Riemann integration, Fubini’s theorem, change of variable formula.

Prerequisite: MATH 3200. 3 lecture hours per week.

**MATH 3400 Probability and Statistics 3.00 CR**
Designed for students in majors that require math-based statistics. This course is a study of probability theory and mathematical statistics including applications. This course partially fulfills requirements for Mathematics Endorsements Level 3 and 4 through the Utah State Office of Education. Offered upon sufficient demand.

Prerequisite: MATH 1220 (with an earned grade of C or better). 3 lecture hours per week.

**MATH 3500 Numerical Analysis 3.00 CR**

Prerequisites: Math 2270, Math 2280. 3 lecture hours per week.

**MATH 3900 Number Theory 3.00 CR**
An overview of number theory and its applications, including the integers, factorizations, modular arithmetic, congruencies, Fermat’s and Euler’s Theorems, Diophantine equations, cryptography, and RSA algorithm.

Prerequisite: MATH 2300. 3 lecture hours per week.

**MATH 4000 Foundations of Algebra 3.00 CR**
Designed for students in all math-related majors. This course covers an introduction to algebraic systems including groups rings, fields and sets. This course partially fulfills requirements for Mathematics Endorsements Level 3 and 4 through the Utah State Office of Education. Offered upon sufficient demand.

Prerequisite: MATH 1220 and MATH 2300 (with an earned grade of C or better). 3 lecture hours per week.

**MATH 4010 Abstract Algebra 3.00 CR**
Continuation of MATH 4000. Topics include Sylow Theory for finite groups, Galois Theory, factorization in commutative rings.
Prerequisite: MATH 4000. 3 lecture hours per week.

**MATH 4100 Intro to Topology 3.00 CR**

An overview of elementary point-set topology. Topics include topological spaces, compactness, connectedness, metric spaces, and Hausdorff spaces.

Prerequisites: MATH 2210, MATH 2300. 3 lecture hours per week.

**MATH 4200 Intro to Complex Analysis 3.00 CR**

An overview of basic theory and applications of complex variables. Topics include analytic functions, contour integration, and conformal mappings.

Prerequisite: MATH 3200. 3 lecture hours per week.

**MATH 4500 Methods/Teaching Secondary School Math 3.00 CR**

Designed for education majors. This course covers methods, remedial instruction and curriculum development for secondary school mathematics. Includes applications of calculators and computers in mathematics. This course partially fulfills requirements for Mathematics Endorsements Level 2-4 through the Utah State Office of Education. Offered upon sufficient demand.

Prerequisite: MATH 1210 (with an earned grade of C or better). 3 lecture hours per week.
APPENDIX D:

LIBRARY AND INFORMATION RESOURCES
Among other resources, the library has the following databases relevant to the Mathematics degree:

**Global Search**: a meta-search engine that searches multiple databases for various topics. It includes catalogs, databases and online resources. This search engine will be replaced soon by a similar search engine to be selected by the Utah Academic Library Consortium.

**Academic Search Premier** (EBSCO Host): a scholarly, multi-disciplinary database with full text coverage of 4600 journals in a range of subjects. This database is a good starting point for almost any topic search.

**American Mathematical Society Journals**: a searchable database that provides full text access to articles published in the journals of the AMS.

**Annual Reviews**: full text of various annual (subject/discipline) reviews online.

**JSTOR**: a scholarship journal archive that provides image and full text access to archival (more than five years old) scholarly journals in various subject areas.

**MathSciNet**: access to over 50 years of mathematical reviews and data. The database is a finding source for citations for scholarship in this discipline.

**Project Muse**: full text of over 40 scholarly journals from the Johns Hopkins University Press.

**Web of Science**: consolidated searching of citation search engines and multi-disciplinary listings of articles in 8500 major scholarly journals.

Other useful resources include the library catalog, electronic books, Utah’s catalog, full-text periodicals list, and interlibrary loan.
